

Phase B1: R32 ($\text{O}_3 + \text{NO}_2^- \rightarrow \text{O}_2 + \text{NO}_3^-$) disable vs baseline — test predator-prey hypothesis

(a) Surface $[\text{O}_3]$ — $z=0$

(b) Bulk-only $[\text{O}_3]$ — $z > 0.1\text{mm}$ vol-avg

(c) Bulk-only $[\text{NO}_2^-]$ — chemistry coupling partner
